## 1. Objective

After 20 people applied the product on both armpits at home at one time, they observed the skin condition and whether the armpit odor reappeared every day, and after the smell reappeared (the whole test did not exceed 60 days), they recorded the deodorization maintenance time, whether the skin had allergic symptoms and time, whether the skin had discoloration and time, whether the skin peeled and time, and scored on the overall like, whether it was suitable for long-term use, purchase intention and price, and at the same time explained what they liked about the product.

## 2. Investigational Product(s)

### 2.1. Usage method

**Table 1 Sample information and instruction**

No.	Product Name	Product No.	Instructions
1	HERBAL ARMPIT DEODORANT CREAM	HBPGA230021	<p><b>【Usage】</b> After bathing, dry the armpits, each armpit must be applied with a sachet of dosage, use your fingers to apply the periphery of the armpit at the same time, do not let the liquid flow downward. For the next few days, apply a small amount of petroleum jelly or body lotion continuously to moisturize, as appropriate.</p> <p>The effect is different depending on the physique, and it can last from 7 days to 60 days.</p> <p><b>【Warning】</b> If you often stay up late, or your body is very tired, or your skin is prone to allergies, please use it</p> <p>Before use, apply to the inside of the wrist for an hour, if there is a rash, redness, itching, it is prohibited.</p> <p>Please stop using this product, and it will recover on its own within a few days, and it will not have adverse effects on the body.</p> <p>Also, avoid direct contact with eyes.</p>

### 2.2. Investigational product(s) requirements

It is required that the client must sign the product safety statement before signing the test to ensure the safety of the investigational product(s). The safety statement is used to ensure that the investigational product(s) used under the prescribed conditions do not pose a foreseeable risk to the health of the subjects.

The investigational product(s) was/were packed and labeled by the Sponsor with the following information:

- Category name
- Expiry date or Period of time after opening (if applicable)
- Storage conditions (if applicable)
- Additional information (if applicable)

To improve traceability, Intertek will add to each investigational product additional information:

- the Intertek reference study number
- Number of subjects
- Sample site (if applicable)

### 3. Subjects

Qualified subjects were selected according to the subject selection and exclusion criteria, and 25 qualified subjects were selected to ensure that the final number of valid cases was at least 20.

#### 3.1 Inclusion Criteria

- ① Male and female, regardless of age range (age evenly distributed)
- ② There is a fox odor under the armpits and can easily smell it on its own
- ③ Able to cooperate well with the subject and maintain a regular routine during the study
- ④ Able to read and understand all the contents of the informed consent form and voluntarily sign the informed consent form
- ⑤ During the test, stop using skin care products of the same category as the test sample

#### 3.2 Exclusion Criteria:

- ① Women who are breastfeeding, pregnant, or planning for family planning
- ② Use of antihistamines in the past week or use of immunosuppressants in the past month
- ③ Use of any anti-inflammatory drugs in the test area in the past two months
- ④ Subjects with inflammatory skin diseases that have not been clinically cured
- ⑤ Patients with diabetes and high blood pressure
- ⑥ Patients with bilateral mastectomy and bilateral axillary lymph node resection
- ⑦ Patients with asthma or other chronic respiratory diseases who are being treated.
- ⑧ Those who have received anti-cancer chemotherapy in the past 6 months.
- ⑨ People with allergies, allergic dermatitis, etc., with a history of skin diseases or diseases
- ⑩ People who are undergoing dermatological treatment, or subjects who have taken hydroxy acids, whitening and anti-aging drugs within one month
- ⑪ or those with other chronic systemic diseases
- ⑫ In addition, the person in charge of the trial judged that it was not suitable to be the subject of this trial

#### 3.3 Prohibition for volunteers during testing period

- ① During the trial, subjects should maintain the same living and eating Xi as before participating in the trial
- ② During the test, it is forbidden to administer treatment to the tested area that affects the test
- ③ During the trial, it is forbidden to change the usual routine and eating Xi

#### 3.1. Screening failure, subject withdraw and replacement rules

Subjects who haven't been included the group: Subjects signed the informed consent, but failed to be included the group because they did not meet the inclusion criteria / exclusion criteria.

Subjects withdraw: After randomization or distribution, the subjects left and fell off.

The subjects that did not complete the research for any reason were no longer replaced.

Criteria for withdraw:

- Subject decision. The subject is at any time free to discontinue, without prejudice to further treatment. (According to the Helsinki declaration)
- Adverse events / Serious adverse events: any researchers believe that continuing trials will be unfavorable to the subjects.
- Severe non-compliance with the study protocol
- Lost to follow up
- Other reasons:
  - In other cases, the researchers believe that continued participation in the trial is unfavorable to the subjects.
  - Termination of the principal

The CRF had to be completed up to the time of screen failure or withdrawal. The last page "finish the study", the adverse events list and / or the combination therapy table are also applicable.

#### 4. Adverse Event

The judgment and treatment of adverse reactions in accordance with the "SHCRS-GP02 Adverse Reactions Incident Instructions" and "GB/T 17149.1-1997 Diagnosis criteria and Principles of Management of Skin Disease Induced by Cosmetics- General guideline".

#### 5. Test Environment

Environmental requirements: room temperature

#### 6. Testing Procedure

##### 6.1 Test the design

After the product is used in the armpits at one time, the skin condition and the armpit odor reappear every day, and a telephone questionnaire will be conducted when the armpit odor reappears. The whole test will not take more than 60 days, and even if there is no smell at 60 days, a telephone questionnaire will be followed up and the test will be completed.

##### 6.2 Test procedure

- ① The consumer comes to the site and signs the informed consent form. Before enrollment, subjects were asked a series of questions about disease history, health status, etc., according to the inclusion and exclusion criteria. Subjects were screened into the combined qualification to ensure that at least 20 people completed the program.
- ② After the technician explains the use of the product on the spot, the product and use log are issued, and the subject goes home to use the test sample and informs the laboratory of the time of using the sample.
- ③ The consumer receives the test product and uses it all at once according to the instructions for use. Observe the condition of the skin and whether the armpit odor reappears daily. When the armpit odor reappears, a telephone questionnaire will be conducted and the test will be completed.

##### 6.3 Service life of the test sample

60 days

## 6.4 Test schedule

**Table 2 Test schedule**

Observation Items\Observation Days	Weekend 0	Weeks 1-6	Week 6
Subjects visit	O	—	—
The product is mailed to the consumer's home for use	—	O	—
Self-assessment	—	O	O

**Note: "O" indicates implementation, "-" indicates no implementation.**

## 6.5 Observation • Test Items

After the product is used in the armpits at one time, the skin condition and whether the armpit odor reappears every day, and a questionnaire return visit is conducted when the armpit odor reappears.

# 7. Data Analysis And Statistical Methods

## 7.1 Valid case

**Table 3 Valid case table**

Classification				Adopted or not
The adopted	The completed		Those completed according to the test implementation plan.	Yes
	Uncompleted cases	The terminated	Those terminated because of adverse events.	No
		Drop out	Those quit from the test because of individual reasons or cannot be tracked.	No
		The nonconformity	Those belonging to poor use of test products or non-compliance with use restrictions due to inappropriate use methods	To be discussed additionally

## 7.2 Statistical data analysis methods

Mathematical statistical analysis method, using EXCEL software to perform descriptive statistics on each measured value, including quantity, mean, etc.

# 8. Termination Or Interruption Of The Trial

The trial may be terminated or interrupted if it is considered difficult to continue the trial due to significant safety concerns. After the person in charge of the trial and the client decide to terminate or interrupt the trial, promptly communicate the news of the trial termination or interruption to all subjects and take all necessary countermeasures.

# 9. Test Time

Trial product receiving date: Sep. 21, 2023

Testing period: Sep. 27, 2023 – Nov. 27, 2023

## 10. Project Performance

### 10.1 Subject Circumstances

Planned to enroll: 25 subjects

screened: 25 subjects

Enrolled: 25 subjects

Completed: 25 subjects

Analyzed: 22 subjects

Subjects' age analysis was shown in Table 4 and detailed in Appendix A.

**Table 4 Subjects' information**

Parameters		Statistical results
Age analysis	Age analysis	22
	Mean age $\pm$ SD	39.1 $\pm$ 9.4
	Minimum age	20
	Maximum age	60

### 10.2 Project Implementation

Test Procedure: Normal

Test Environment: Normal

Data Processing: Normal

### 10.3 Adverse events: None

### 10.4 Protocol deviation: None

## 11. Self-Assessment Results

11.1. The results of the survey on the subject's overall product liking and the aspects of likes and dislikes are shown in Table 5, Fig. 1 and Table 6, and the questionnaire results are detailed in Annex D.

**Table 5 Results of subjects' self-assessment satisfaction survey (Number of subjects: 22)**

(7-point scale) *	Frequency	Percentage (%)
Top3 (7+6+5)	19	86.4
Top2 (7+6)	15	68.2
average value	5.77	

Note\*: 7 - Strongly liked, 6 - Somewhat liked, 5 - Somewhat liked, 4 - Doesn't care like it or not, 3 - Somewhat disliked, 2 - Somewhat disliked, 1 - Very disliked

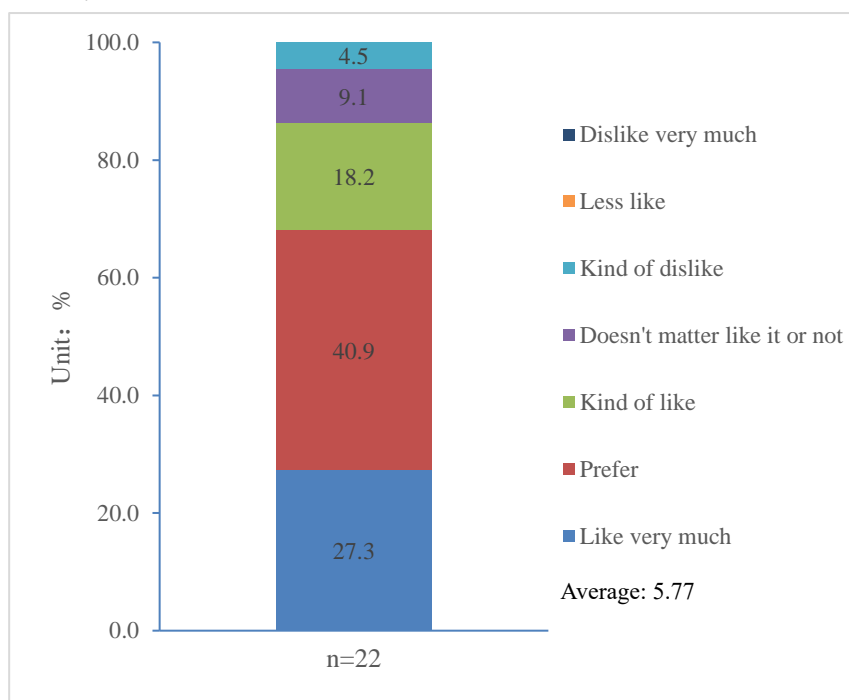

Fig.1 The results of the subject's overall product liking

**Table 6 Results of the respondents' preference for the tested product (Number of subjects: 22)**

	Frequency	Percentage %
Long deodorization time	17	77.3
product packaging is well designed	4	18.2
product smells good	10	45.5
Easy to use	16	72.7

11.2. The subjects recorded the number of days of deodorization, the evaluation of whether it was suitable for long-term use, the purchase intention, and the results of the pricing survey, as shown in Table 7-10 and Fig. 2-5, and the questionnaire results are detailed in Appendix D.

**Table 7 Results of the number of days of deodorization recorded by the subjects (Number of subjects: 22)**

(Days)	frequency	Percentage %
0-5 days	1	4.5
6-10 days	2	9.1
11-15 days	6	27.3
16-20 days	3	13.6
21-25 days	6	27.3
26-30 days	4	18.2
Average (days).	18.23	

Fig. 2 Test results of deodorization duration days

**Table 8: Results of the subject's evaluation of the product's suitability for long-term use (Number of subjects: 22)**

	frequency	Percentage %
suitable	17	77.3
unsuitable	0	0.0
uncertain	5	22.7

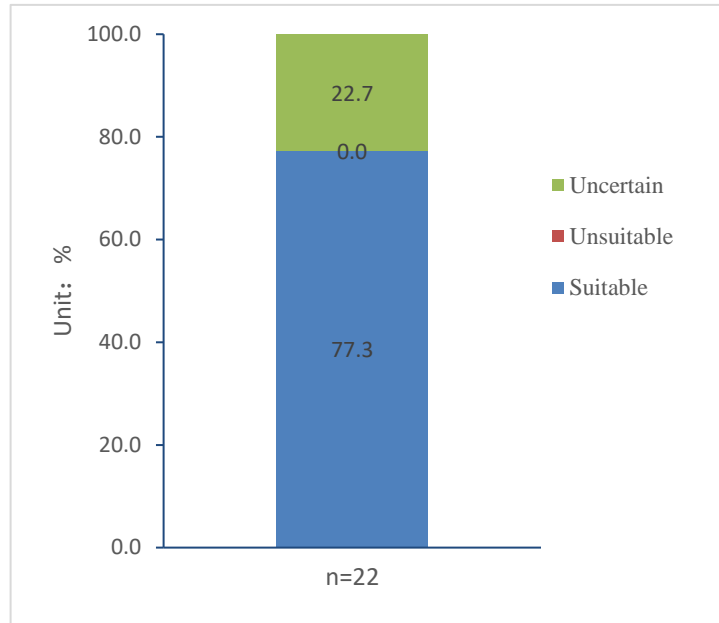

Fig. 3 Test results of whether the product is suitable for long-term use

**Table 9 Survey results of subjects' purchase intention (Number of subjects: 22)**

	frequency	Percentage %
want to purchase and use	21	95.5
don't want to purchase and use	1	4.5

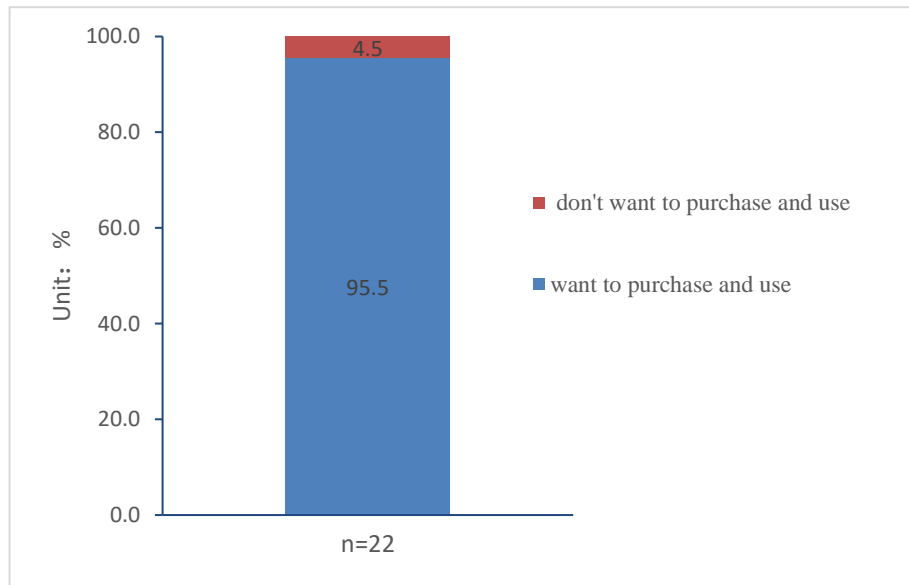

Fig.4 Result chart of the subject's purchase intention

**Table 10 Results of the survey on product pricing of subjects (Number of subjects: 22)**

	frequency	Percentage %
0---9 CNY	2	9.1
10---19 CNY	2	9.1
20---29 CNY	6	27.3
30---39 CNY	4	18.2
40---49 CNY	3	13.6
50---59 CNY	3	13.6
60---69 CNY	0	0.0
70---79 CNY	1	4.5
Above 80 CNY	1	4.5
Average value (CNY).	30.98	

Figure 5 Chart of product pricing survey results

11.3. The subjects recorded the results of the skin condition survey after using the product, see Table 11, Figure 5, and the questionnaire results are detailed in Annex D.

**Table 11 Subjects recorded the results of skin condition after using the product (Number of subjects: 22)**

Skin condition	frequency	Percentage %	Skin anomalies
Allergic	Severe allergies	0	No allergies
	Mild allergies	0	
	No allergies	22	
Discoloration	Whitening	0	No discoloration

	Nigrescence	0	0.0	
	No discoloration	22	100.0	
Desquamated	Severe desquamation	0	0.0	No desquamation
	Mild desquamation	0	0.0	
	No desquamation	22	100.0	

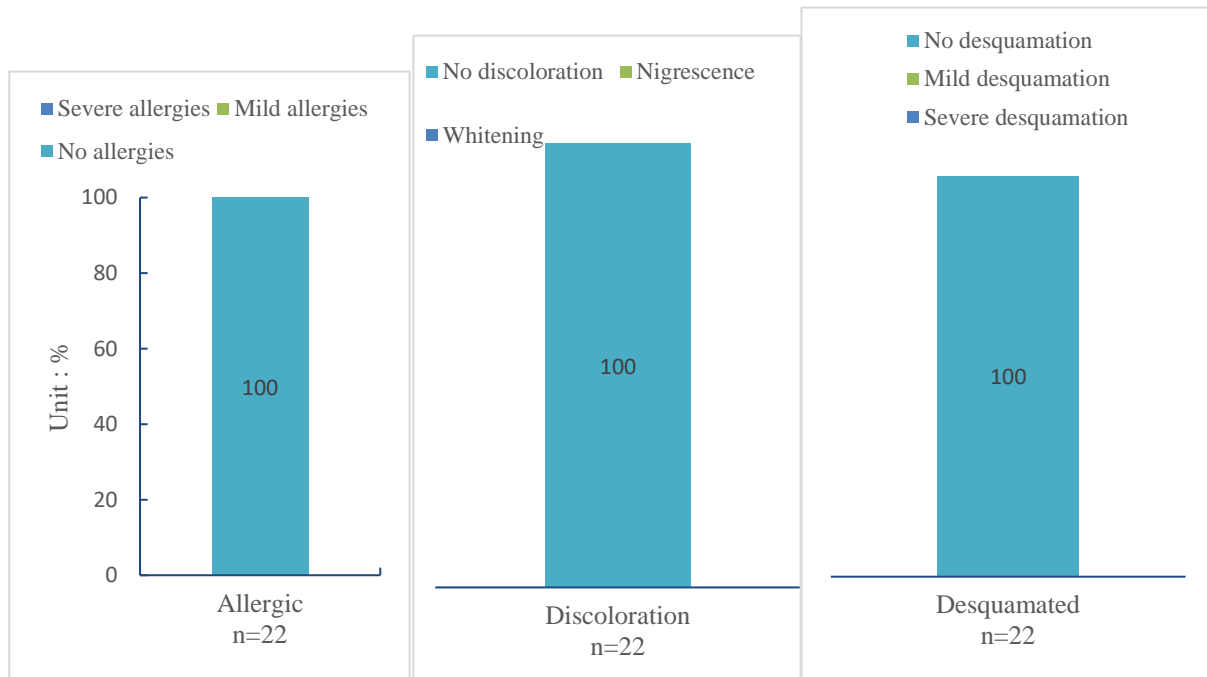

Fig. 6: Result chart of the subject's skin condition after using the product

## 12. Conclusion

### 12.1. Conclusions of the Self-Assessment Questionnaire:

Conclusions of the subject's self-assessment: After 22 people used the product in the armpit at one time, the skin condition and whether the armpit odor reappeared every day, and the telephone questionnaire return visit was conducted when the armpit odor reappeared, and the results were as follows:

- 86.4% of the subjects said they liked the product (very much, somewhat liked, or somewhat liked);
- The average duration of deodorization was 18.23, and the proportions of more than 5 days were 95.5%, 86.4% and 45.5% were more than 10 days.
- 77.3% of the subjects said that the long deodorization time was what they liked about the product, 72.7% liked the ease of use, and 45.5% liked that the product smelled good
- 77.3% of the subjects believed that the product was suitable for long-term use;
- 95.5% of the subjects were willing to buy the product, and most of the subjects (72.7%) were willing to buy the price range between 20-59 CNY, and the average price of the subjects was 30.98 CNY.
- There were no allergies, discoloration, and peeling in the subjects.

## Report Appendix

### Appendix A Subject's Information

Subject's No.	Subject's Initials	Gender	Age	Occupation	Finished or not
1	LYQ	Female	60	retire	be
2	NXJ	Female	39	Company Employees	be
3	WG	man	35	Construction	be

## Appendix C Self-assessment Questionnaire

Record the date the respondent started using the product: \_\_\_\_\_ year \_\_\_\_\_ month \_\_\_\_\_ days

The date of the respondent's odor reappearance was recorded: \_\_\_\_\_ year \_\_\_\_\_ month \_\_\_\_\_ days

Calculate the number of days the product lasts (verification confirmation): : \_\_\_\_\_ days

A1. Which of the following best represents your overall liking for this underarm deodorant?

- Like very much ..... 7
- prefer ..... 6
- Kind of like ..... 5
- Doesn't matter like it or not..... 4
- Kind of disliked..... 3
- Less like ..... 2
- Dislike very much ..... 1

A2. Have you ever experienced allergies to your skin? [Read out the options.], Don't read out the numbers, Single]

- Severe allergies ..... 3
- Mild allergies ..... 2
- No allergies ..... 1

If you choose 2/3:

Notes: How many days after using the product do you start experiencing allergies? days

Log: How many days did the allergy last? days (until the end of the test)

A3. Have you ever experienced discoloration of your skin? [Read out the options.], Don't read out the numbers, Single]

- Whitening..... 3
- Nigrescence..... 2
- No discoloration..... 1

If you choose 2/3:

Notes: How many days after using the product does it start to show discoloration? days

Log: How many days did the discoloration last? days (until the end of the test)

A4. Have you ever peeled your skin? [Read out the options.], Don't read out the numbers, Single]

- Severe desquamation..... 3
- Slight desquamation..... 2
- No desquamation ..... 1

If you choose 2/3:

Notes: How many days after using the product does peeling begin? days

Log: How many days did the peeling last? days (until the end of the test)

A5. Do you think this product is suitable for long-term use? [Read out the options.], Don't read out the numbers, Single]

- Suitable ..... 1
- Unsuitable ..... 2
- Uncertain ..... 3

A6. What do you like about this product? [Read out the options, don't read out the numbers, select more].

- Long deodorization time ..... 1
- Product packaging is well designed ..... 2
- Product smells good ..... 3
- Easy to use ..... 4
- Log: Anything else? (Logged Points)

---

---

A7. Do you want to buy and use it? [Read out options, don't read out numbers, single choice].

- I want to purchase and use ..... 1
- I don't want to purchase and use ..... 2

A8. Regardless of the packaging grade, only the effect is evaluated, compared with other similar products, how much will you buy this product? [Read out options, don't read out numbers, single choice].

- 0---9 CNY ..... 1
- 10---19 CNY ..... 2
- 20---29 CNY ..... 3
- 30---39 CNY ..... 4
- 40---49 CNY ..... 5
- 50---59 CNY ..... 6
- 60---69 CNY ..... 7
- 70---79 CNY ..... 8
- Above 80 CNY ..... 9

Age of the respondent: \_\_\_\_\_ year Gender of the respondent: \_\_\_\_\_ Respondent's

Occupation:

## Appendix E Adverse Event

None

## Attachment F Sample Picture

## End of report

The reported determination of conformity has taken into account the customer's agreed rule that Intertek has taken into account the measurement uncertainty calculated by our lab and applied it in accordance with ILAC-G8/09:2019 (Conformity Determination Based on Non-Binary Decisions Based on Guard Band Length Equals Extended Measurement Uncertainty). Except where the judgment rules have been specified in the customer, regulations or standard specifications. This rule only applies to numerical test results.

The survey samples and survey sample information in this report are provided by the customer and the customer is solely responsible for its authenticity and completeness, and the results are only applicable to the samples received and tested for the survey. With respect to this report, Intertek shall have no duty of care or other liability to any person other than Customer; and Intertek shall have liability to Customer only to the extent expressly provided in the terms and conditions of the provision of services to the Applicant. Intertek makes no warranties or representations of any kind, express or implied, with respect to this report other than within the scope of the foregoing terms and conditions. Intertek is committed to conducting the audit on a diligent and meticulous basis and shall not be liable for any damages, including contract, tort, statute or otherwise, arising out of or in connection with this report, unless the outcome of the action appears to be due to Intertek Caused by gross negligence or willful misconduct. Without the written permission of the company, this test report shall not be partially copied, lent or backed up

Note: The test data and results issued in this report are only used for internal reference by specific entrusting parties for scientific research, teaching, internal quality control, survey sample research and development, etc.
